SOFT SKILLS

- Attention to detail
- Team work, Leadership
- Time management
- Self-organization, initiative
- Good communication

LANGUAGES

- English - Intermediate
- Ukrainian - native
- Russian - native
- Czech - beginner

SUMMARY

Frontend Developer with over a year of commercial experience across two companies, working with React, TypeScript, HTML, CSS, and Tailwind CSS. My experience includes building landing pages for outsourcing projects and developing web applications from design mockups. At one company, I started in an HTML/CSS development role and was promoted to Frontend Developer.

Based in Prague, Czechia, with temporary protection status. Available to start immediately and open to working on-site in Prague or remotely.

WORK EXPERIENCE

Influence Pro Services Apr 2025 – Sep 2026 Frontend Developer
Remotely

Developed web applications and landing pages based on design mockups using HTML, CSS, React, TypeScript, and Tailwind CSS.

EvoPlay (Outsourcing) Jan 2025 – Mar 2025 Frontend Developer
Remotely

- Working on company projects on an outsourcing basis
- Developing user interfaces using modern technologies

Comprehensive School Sep 2018 – May 2021 Physics teacher
Ukraine, Kherson region, Novooleksandrivka

In this role, I improved my stress resilience, enhanced my teaching skills, and developed stronger communication and time management abilities.

PROJECT EXPERIENCE

Portfolio (Personal Initiative), GitHub [HTML, CSS, JS]

This is an individual project (multi-page website) showcasing all of my projects, organized into categories for easy navigation. The homepage features a slider displaying the latest 10 projects, and the website also includes a dark theme option.

AquaTrack (Team project), GitHub [React, Redux, CSS]

In this project, I was the Tech Lead. The web app tracks users' water intake and calculates their daily hydration goal. I developed the calendar, welcome section, user settings form logic, and assisted with the water card list and progress bar logic.

Merge Cruise, Joy Blast (Charity projects) GitHub - 1, 2 [HTML, CSS, JS]

Merge Cruise and Joy Blast are two real charitable projects developed by a team of two developers and one designer.

I personally contributed to at least half of the frontend development for each project and conducted code reviews, as the repositories were under my management. I was also responsible for ensuring the successful completion of these projects.

EDUCATION

Kherson State University 2015-2020 Physics teacher

IT School GoIT 2024-2025 Fullstack Developer
